PELVIC ASSISTANT

**5. Attach Uterine Manipulator**
- Ensure attachment is firm

**6. Adjust Tension**
- Push handle up, down, left & right
- Gentle inward pressure optimises visualisation
- Rod will slide down inside Ball Joint

**7. Manipulating Uterus**
- Simply flexing pivot joint will not achieve anteversion.

**8. Colpotomy**

**9. Anteversion**
- You must push handle down for anteversion
